2. Claims 1-5, and 7-8 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art relied upon fails to teach a system, as in applicant's claim 1, that uses separate dummy keys in combination with a service key for tracing a cracked device by monitoring key information provided by a pirate, wherein the separate dummy keys are provided to different groups and an ECM identifying the correct key is sent to all devices just before the first key is needed. Furthermore, the prior art fails to disclose, as in applicant's claim 4, sending search EMMs, wherein each message comprises a different dummy key, which is a key other than the correct service key, sent to a different terminal or
